## **Mitsubishi Electric WD620U/ FD630U:**

### **Maximum resolution for mobile applications**

Mitsubishi Electric has expanded its range of powerful business projectors with the WD620U and FD630U models. WXGA and full HD 1080p resolution make these new DLP units ideally suited to the presentation of complex data. A contrast ratio of 2000:1 and high light output of 4,000 ANSI lumens guarantee, even under unfavourable presentation conditions, a quality of image for which Mitsubishi Electric is renowned. These portable projectors offer a large number of intuitive display optimisation functions. Mitsubishi Electric has also enhanced acoustic enjoyment with an integrated 10-watt speaker and operating noise of just 29 dB in 'Low Mode'. With these features, the WD620U and FD630U add life and clarity to any kind of meeting or presentation.

Those with a packed schedule of appointments will appreciate the Instant Shutdown function along with the compact size and low weight of these robust projectors. The password protection, programmable start logo and Wall Screen functions also enable the WD620U and FD630U to satisfy demands for flexibility, security and operating convenience. Operating costs are kept to a minimum with a lamp service life of over 5,000 hours in 'Low Mode', low maintenance requirements and low energy consumption: the units require less than one watt in 'Standby Mode'. The features and benefits of these high-performance projectors make them reliable partners for professional users in seminar rooms, classrooms and conference halls.
