

Mitsubishi Electric starts sales of TFT-LCD Modules in Europe

Mitsubishi Electric announces sales of Thin Film Transistor Liquid Crystal Display (TFT-LCD) modules for industrial applications in Europe. Business support will be handled through the Semiconductor European Business Group headquarters located in Ratingen, North-Rhine Westphalia in Germany. With the sales of TFT-LCD modules Mitsubishi Electric intends to offer strong support to local European customers.

Mitsubishi Electric's color TFT-LCD modules for industrial applications have a product range from 4.3" to 17.5". They offer optimal visibility through products with various technologies like wide viewing angle and white LED backlight version. Furthermore, they feature high reliability respectively forward compatibility and long term support as well as enhanced view ability through Mitsubishi original technology: a Natural Color Matrix (NCM) and Feed Forward Driving (FFD). All TFT-LCD modules are RoHS compliant.
